

Operating Systems — End Semester Examination (Sample) 2024

Part A — Short Answer Questions (2 marks each)

1. Define a process and differentiate it from a program. 2. List the four necessary conditions for deadlock. 3. What is the difference between paging and segmentation? 4. Define context switching.

Part B — Long Answer Questions (10 marks each)

5. Explain the Round Robin CPU scheduling algorithm with a suitable example. 6. Describe the Banker's Algorithm for deadlock avoidance. 7. Explain demand paging and the LRU page replacement algorithm.
